AQUALISA

PREMIER COLLECTION

CREATING THE DREAM

Indulge in our bespoke collection designed for your perfect bathroom.

INFINIA™

Engineered by the digital shower experts, Aqualisa Infinia™ combines all of the quality and premium feel of the best dual control mixers, with Aqualisa digital technology.

With one-touch start/stop, LED temperature indicator, precision temperature control and dual outlet, Aqualisa Infinia™ delivers the perfect shower, every time.

No need to be in the shower for it to start. With a remote control, your shower will warm up before you step in. Plus, with an Eco setting delivering a perfect shower with 33% less water, Aqualisa Infinia™ is a true guilt-free pleasure.

Infinia™ control with Tondo dials and remote control.

LESS IS MORE

The thinnest shower in its class.

Aqualisa Infinia™ boasts an ultra-thin control plate of just 2.5mm, which sits flush to the wall, for the most seamless look available.

ENDLESS CHOICE

With Aqualisa Infinia™ you can express your own sense of style and individuality. The hand polished shower control can be tailored with a choice of three different and equally elegant designer dials: Piazza, Tondo or Astratta (see page 23). All of which come in a choice of two different finishes: chrome and white/chrome.

Infinia™ control with Piazza dials.   Infinia™ control with Tondo white dials.
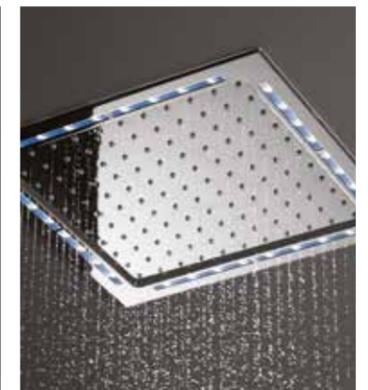

AQUALISA
Q™ EDITION

Q™ EDITION offers personalisation capabilities that take the showering experience to a whole new level. The on/off touch switch has been specifically designed to work in a wet environment and landmark technology includes a proximity sensor that reduces flow to save water when you step away from the shower, to wash or condition your hair or shave.

MORE THAN JUST A SHOWER: A PERSONAL SHOWERING EXPERIENCE
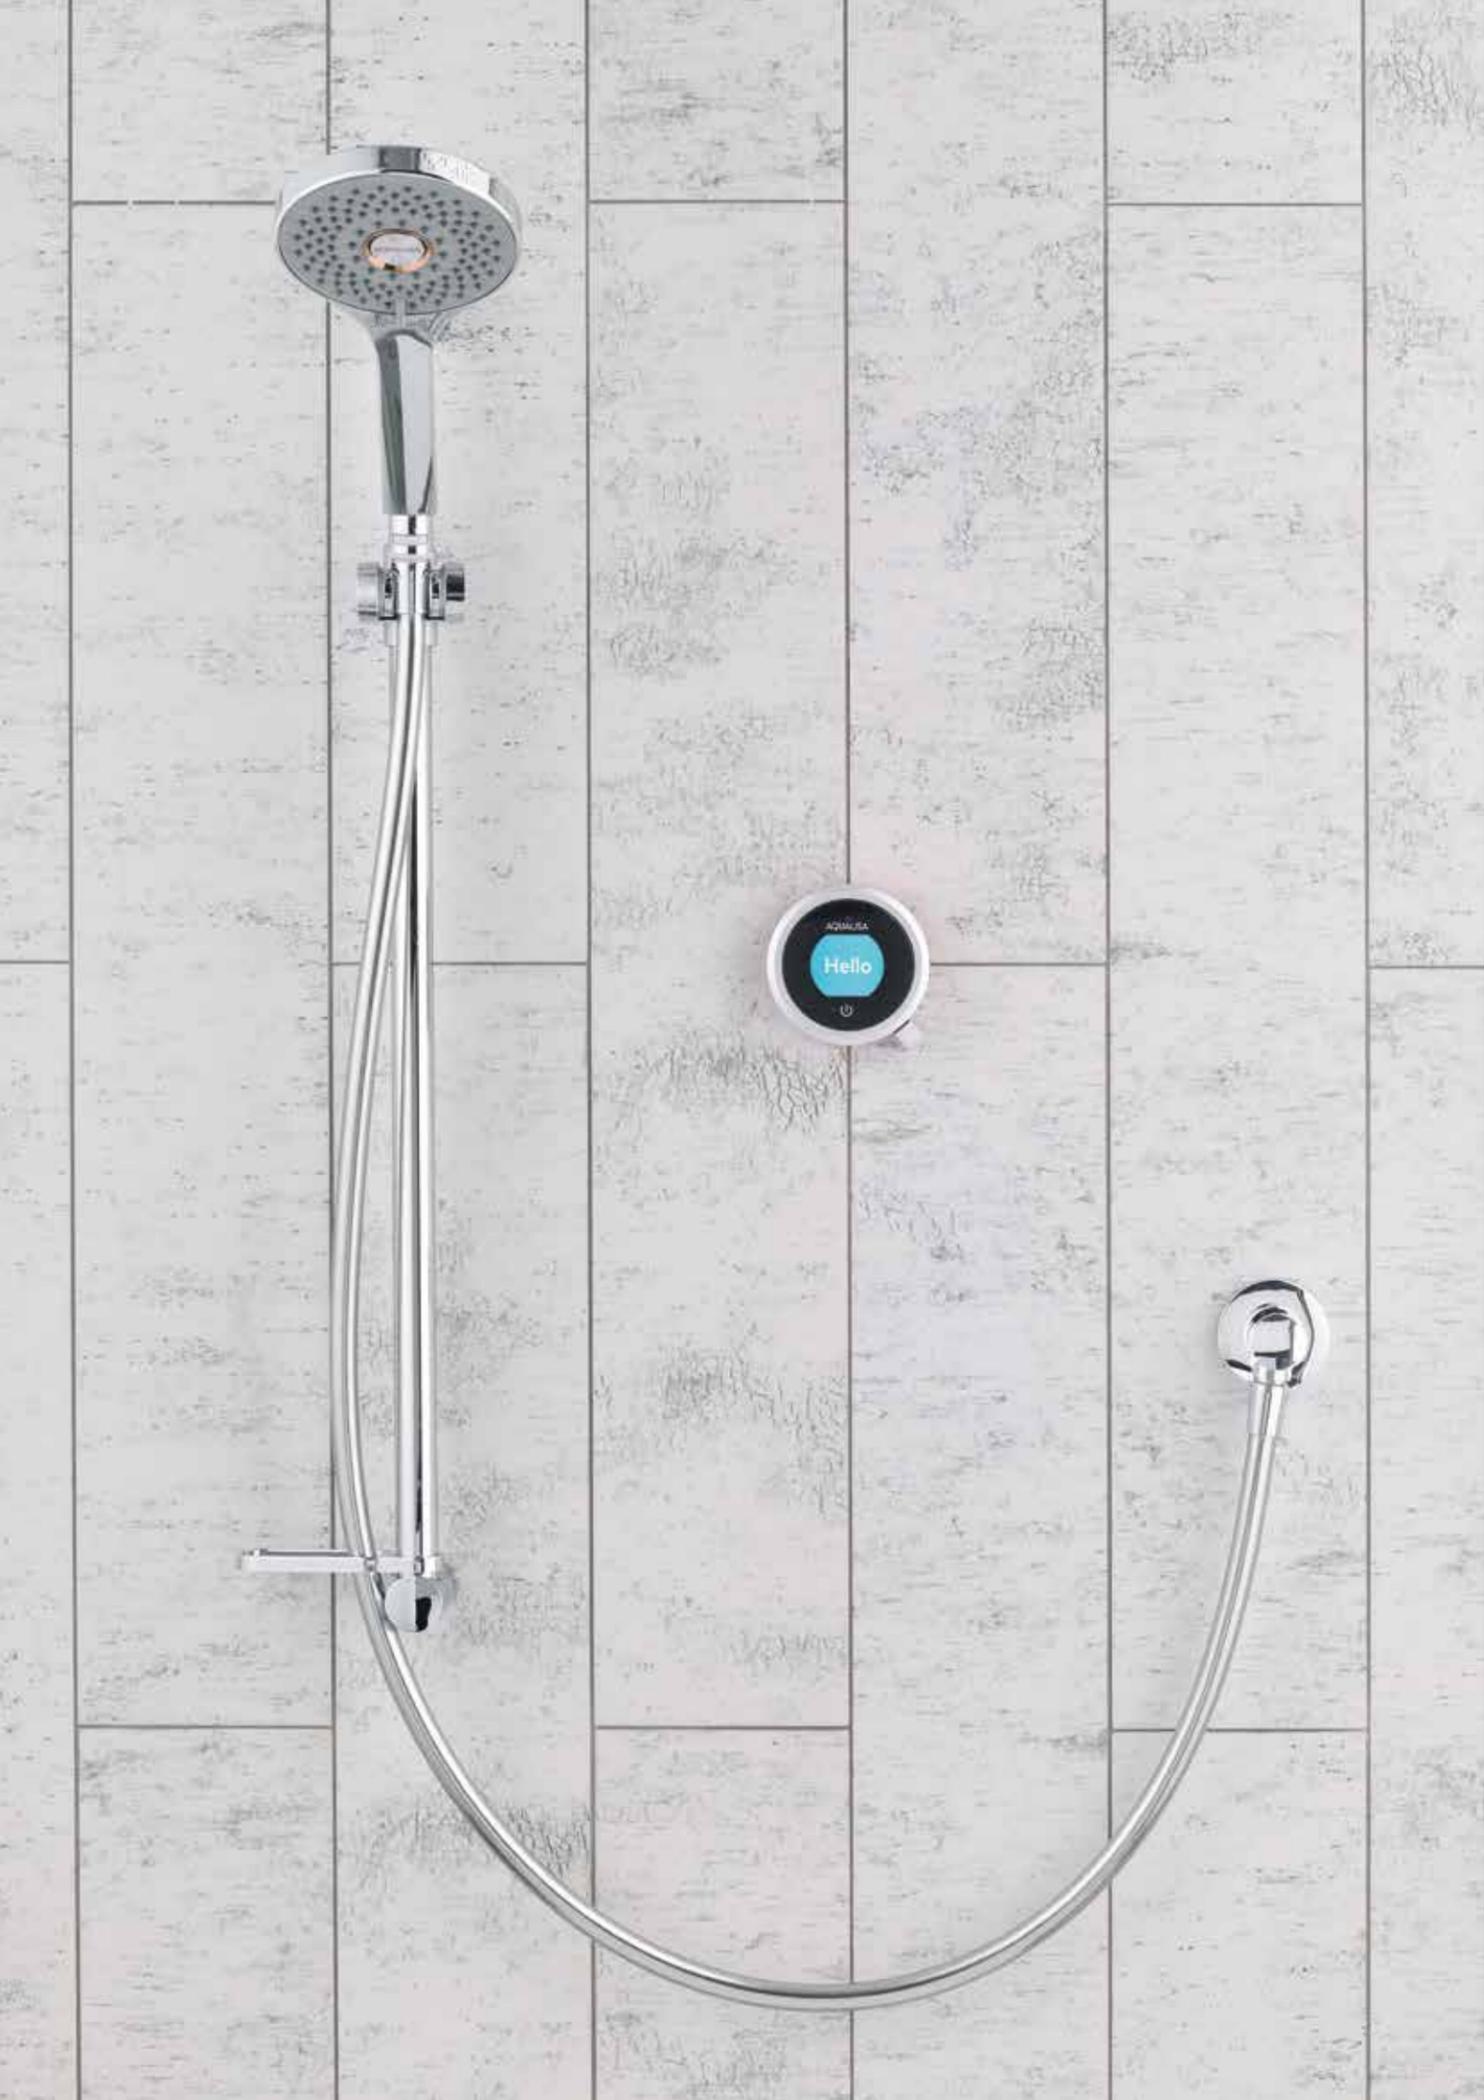

EXTRAORDINARY SHOWERING

Q™ EDITION is not just a shower, but extraordinary showering. Crafted with high quality materials, it has been designed with individuality and style in mind. From the seamless motion of the multi-functional Q™ lever to the five customisable metallic accents.

Personalisation is at the very heart of Q™ EDITION: MyQ™ gives you the ability to choose from a range of six pre-set experiences that we have created for you to suit your mood and lifestyle, like 'Sport', 'Eco' or 'Comfort', as well as the option to create and save your own shower experiences so that you can repeat that perfect shower every time.

Intuitive and easy to use, with its simple on/off touch switch, Q™ EDITION greets you with a friendly 'Hello' displayed on its screen before it powers on. Its warm up feature will hold the water at your desired temperature until you're ready to start your shower, and the multi-functional Q™ lever adjusts the flow when you move it up and down and navigates you through the menu. As with all our Premier digital showers, it comes with a remote control so that you can power on your shower and have it perfectly pre-warmed before you step in.

HIQU™ SHOWER

The elegance of HiQu's™ contemporary design combines with the intelligence of Aqualisa's award-winning smart technology to deliver an intuitive shower.

Single touch start/stop with precision water-blending and lighting display that intuitively indicates the water temperature and flow. When the lights are red the water is heating up, blue means it's cooling down and when they are white and steady, that's HiQu's™ advanced smart valve telling you that your ideal shower is ready.

With its neat remote control you can enjoy the convenience of setting your shower running from outside the enclosure. HiQu™ Dual Outlet Showers offer the added bonus of allowing you to choose between two outlets to commence showering or begin filling a perfect bath.

HIQU™ BATH

Indulge yourself in a truly smart bathing experience at the touch of a button and without a tap in sight.

Select full, half or shallow fill: HiQu™ Bath will fill your tub to the depth and precise temperature you choose. The intuitive lighting display will tell you when the water is flowing at your specified temperature. HiQu™ will safely stop filling your bath when your chosen depth has been reached, so you can just 'fill and forget'.

If you choose to stay in your bath a little longer, go ahead and indulge yourself with HiQu's™ Top Up function. It can add more hot water to bring a cooling bath back to perfection. HiQu™ Bath Dual Outlet can be accessorised with your choice of stylish hand showers for a totally co-ordinated bathroom.

For family bathrooms, place a HiQu™ Dual Outlet Shower system over the bath and team with a bath fill, so that at the touch of a button you can effortlessly switch between the bath fill and shower.

RISE™

Rise™ is all about simplicity; beautifully simple aesthetics, thoughtful features and simple installation.

A single touch will have the Rise™ warming up, whilst the sophisticated LED display lets you know when it's time to step in once it's reached the perfect temperature, so you never need to wait in the shower for the water to warm up. A remote control allows you to start the shower remotely and to divert when necessary.

Rise™ is suitable for single and dual outlets, enabling you to switch instantly between shower heads and/or a bath fill.

RISE™ DCV

Rise™ DCV is a thermostatic dual control mixer shower designed with clean, simple lines made with quality materials. Sophisticated and timeless, it is the perfect solution if you are looking for a stylish and contemporary look.

Whether you choose a single, divert or three-way solution, teamed with your choice of accessories and fittings, Rise™ DCV will ooze elegance and luxury, whilst also offering you maximum flexibility with its divert system.

HIQU XT™

HiQu XT™ is a thermostatic shower and bath shower mixer range that combines modern looks with an exceptional showering experience. From its high quality all-metal chrome finished controls to its sleek lines and architectural details, HiQu XT™ will have pride of place in any bathroom.

With HiQu XT™ you will enjoy a powerful, invigorating shower, every time. For low pressure gravity water systems add a twin-ended booster pump to deliver a drench-like showering experience.

HiQu XT™ delivers more than just high-performance showering with precise temperature control. It also comes with a host of thoughtful features, like the Eco Flow control and a temperature override button for safety and peace of mind.

The HiQu XT™ Bath Shower Mixer features a diverter that lets you switch seamlessly between bathing and showering, and can be bath or wall mounted, making HiQu XT™ an elegant and ergonomic choice for any bathroom space.

CONTROLLERS

From digital showers to traditional mixers, the
controller lies at the heart of your shower or bath.

INFINIA™

Infinia™ Controls

Aqualisa Infinia™ delivers all the trusted benefits of a thermostatic valve, with the increased efficiency and sleek design of intelligent, digital showering. You can tailor the look of the control to suit your bathroom style with a choice of three designer dial shapes and finishes.

① **Start/Stop button (Infinia™ Shower) –** Press button to start. Water will dispense at the flow and temperature set by the controls.

Start/Stop and Divert button (Infinia™ Dual Outlet Shower) – Press button to start. Water will dispense to the preferred outlet. Press and hold to divert.

② **Temperature control**

③ **Flow control**

④ **LED Display –**The LED light will change colour accordingly, spinning clockwise or anti-clockwise to denote increases or decreases in temperature (red or blue), flow (white) or a change of outlet (purple).

Q™ EDITION

Q™ Edition Controls

With its sleek contemporary design, smart features and colour display screen, Q™ EDITION is intuitive and easy to use.

1 **On/off touch switch –** Touch to power on and power off the controller.

2 **Proximity sensor –** As you approach the controller, the display wakes up and is ready to go. If 'water save' is active this feature automatically reduces the water to minimum flow when you step away, to save water.

3 **Temperature bezel –** Turn clockwise or anticlockwise to increase or decrease temperature.

4 **Q™ Lever –** Move up and down to increase or decrease water flow and navigate menu. Push in to access pre-set and personalised shower experiences and confirm selection.

5 **Display –** Colour screen appears when using on/off touch switch or proximity sensor.

MyQ™ – shower experiences

At the heart of the menu lies MyQ™. A range of six pre-set shower experiences designed to give you a choice of showers to suit your mood and lifestyle, based on pre-set combinations of flow, outlet, temperature and duration.

Family   A 7-minute handset shower at 38°.

Sport   A hot 40° 8-minute shower from the drencher at maximum flow.

Eco   A short 3-minute cooler shower at 37°, with 'water save' on

Comfort   A gentle shower at 39° with no set time.

Refresh   A long 12-minute shower at a cooler 37° with maximum flow.

Drench   A long 15 minute 42 ° shower at maximum flow.

Product dimensions are in mm and are for guidance only.
Please refer to installation guide for installation requirements.

Q™ Edition Metallic Accents

With a choice of five metallic accents, you can add a touch of elegance and modernity in your bathroom. Simply select an Accent Pack, which includes your choice of accent for the Aqualisa Vita™ Handset and the Q™ EDITION bezel.

Programming HiQu™ Bath

Press the Start/Stop button to start the water flowing. Select 'Bath Set Up mode', put in the plug and press and hold the Start/Stop button until the LED flashes purple. When the water has reached the depth you desire for a full fill, press Start/Stop again and the controller will remember the depth you have chosen.
It will also automatically convert this into shallow fill and half fill depths. All you have to do is decide how hot or cool you want your bath, select the bath depth and press 'Start' for a perfect bathtime.

Product dimensions are in mm and are for guidance only.
Please refer to installation guide for installation requirements.

RISE™

Rise™ Controls

Rise™ has been designed to deliver an intuitive, intelligent showering experience. Its thoughtful water saving features can be activated as required to suit you and your family's needs. The LED lighting comes as standard and the clever display will show you when it's time to step in – whilst the remote control allows you to start the shower without reaching into the enclosure.

1. **Start/Stop button (Rise™ Shower single outlet)**
   Press button to start/stop.

2. **Temperature control**

3. **LED Display**
   A white LED will flash to denote increases or decreases in temperature.

4. **Start/Stop and Divert button (Rise™ Dual Outlet Shower)** – Press button to start/stop. Water will dispense to the preferred outlet.

Rise™ Shower
single outlet control

Water saving features

You can programme a number of water saving features on the control:

Warm up* - Step in when your shower reaches temperature.
Pause* - For up to 2 minutes when shampooing or shaving.
Timer – You can decide how long you want the shower to run, up to a maximum of 20 minutes.

*Due to the performance characteristics of combination boilers, it is not recommended to activate these options

HOW AQUALISA DIGITAL SHOWERS WORK

Aqualisa Quartz Smart Valves™

Powered by Aqualisa's award-winning smart technology, Q™ Edition, Infinia™, ilux™, Rise™ and HiQu™ are controlled by a compact smart valve. This small but powerful device blends the hot and cold water and controls the flow with smart precision to exactly the flow and temperature selected, regardless of the external temperature or conditions. It can be located up to 10 metres away from the bathing area, in the loft, airing cupboard or under the bath and delivers the perfect bath or shower every time.

Quartz Smart Valves™ also benefit from Aqualisa's 5 year manufacturer's guarantee.

Which Quartz Smart Valve™ is right for you?

The correct smart valve solution will be determined by the water system in your home.

The Quartz Smart Valve™, which is no larger than a shoe box, is for use with high pressure water systems which can include a combination boiler or mains fed water. It can also be teamed with a suitable twin ended booster pump for low pressure systems requiring a powerful boost.

The Gravity Pumped version integrates a pump to provide extra power for gravity systems.

Smart Diverter

Approximately half the size of a smart valve, the smart diverter simply connects to the smart valve and converts a single outlet smart product into a dual outlet smart product.

The ingenious smart diverter has the ability to enable either outlet to work separately, or simultaneously if required on certain products. It can even select your preferred outlet to operate first, every time – ideal when switching your shower on using your remote from outside of your shower area.

If fitting a Smart Diverter and HP/Combi Smart Valve complete with a separate booster pump, a suitable universal pump (which works on both positive and negative head conditions) will be required.

Product dimensions are in mm and are for guidance only.
Processor colour may vary.

The Premier Collection suits any home

Before planning your ideal Aqualisa bathroom, it's important to understand how your choice of shower or bath will work with your water system. The following diagrams are just a few examples of different configurations, which will give you a good idea of how the set-up will fit around your bathroom.
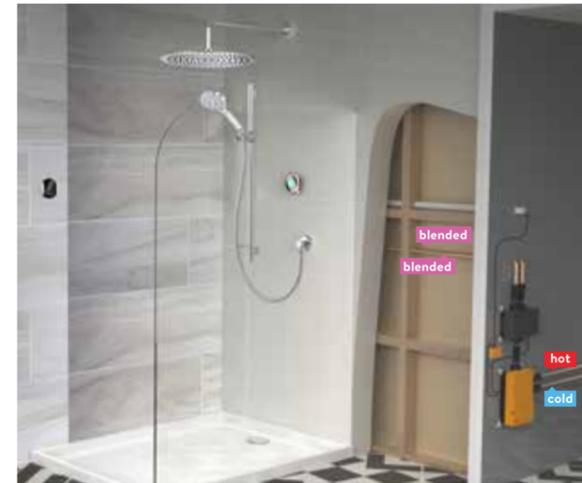

Dual Outlet Shower
Q™ EDITION Dual Outlet
with Option Kit OPN5009 and
